BIVY® STICK

TWO-WAY SATELLITE COMMUNICATOR

The Bivy® Platform

Comprised of the Bivy Stick and Bivy App, the Bivy Platform pairs feature rich hardware and software to create the perfect blend of safety and convenience. Ideal for adventures and off grid activities of all shapes and sizes, utilize the Bivy Platform to plan, stay on track, and remain in contact with everyone that matters throughout the experience, all while knowing that help is always available at the simple push of a button.

Bivy Stick's Role

Use the Bivy Stick to turn your cell phone into a satellite communication device. With global satellite coverage via the Iridium satellite network, anywhere you have a view of the sky, you can communicate through the Bivy Stick. While conveniently compact, the Bivy Stick still offers a comprehensive feature set including two-way text messaging, SOS, location sharing, one-touch Checkin, and detailed weather reports sent straight to your cell phone via satellite. Additionally, offering a feature not provided with many other satellite communicators, the Bivy Stick provides users with a dedicated phone number and email. This important feature allows unsolicited incoming messages, meaning that those that are most important to you can reach you at any time, without the need for you to initiate contact.

The value of the Bivy Stick is further enhanced via key accessories such as the large variety of available mounting options. The many available mounts allow users to attach the Bivy Stick to any vehicle, backpack or structure and make it an ideal device for adventurers who find themselves going from one activity to another.

Bivy App's Role

The Bivy app has more than 50,000 adventures ready to be explored. No matter what you like to do in the outdoors, you can find a place to do it with the Bivy app. With twenty different adventure types all at your fingertips, the Bivy App is a versatile tool that can facilitate all your adventure needs. The Bivy App also allows you to keep track of all your adventures. Track your pace, mileage, altitude and more. Plus get access to detailed offline maps everywhere in the world. Always know where you are, even without cellular service.

As a leader in life-saving products for both professional and recreational use, ACR's Bivy Stick brings the safety and peace of mind of affordable and reliable satellite communication to everyone.
