24/7
worldwide support

Our unique guarantee ensures our promise to fully support you before, during and after your purchase. We will advise you which of our products best suits your needs, support you during the installation, if you need our help, and assure you of an excellent ongoing aftercare service. We offer a lifetime guarantee for repair or replacement. The most important thing for us is that you are wholly satisfied with our quality equipment.

Marine equipment advice

We guarantee to help you maintain the product at all times and in all conditions thus extending its life. Use the QR code present in the packaging or visit our website for all that you need to know about the technical, installation and maintenance details. If you need more help, please contact us.

Ongoing maintenance and repair services

Our in-house service centre exists to ensure your equipment remains in peak condition to give you trouble-free navigation.
If the equipment is damaged, in need of a replacement part or needs serious maintenance it will be restored and returned to you in no time.

Our repair and replacement policy

We are committed to producing quality, reliable marine equipment. In the unlikely event your item fails, at any time during its useful life, due to a manufacturing defect, we guarantee to repair or replace it with immediate effect, free of charge.

AUTONAUTIC PROMISE

Our story

Founded in Barcelona in 1975 by *Joaquim Fabregat*, **Autonautic Instrumental** began as a small workshop dedicated to the design and manufacture of magnetic compasses and marine navigation instruments. Built on craftsmanship, accuracy and reliability, the company quickly earned a reputation for producing dependable products capable of withstanding the most demanding marine environments. Many of those early instruments remain in service today.

In 2004, *Marc Fabregat*, Joaquim's son, joined the company and accelerated its international growth. Today, Autonautic exports to more than 40 countries worldwide, supplying magnetic compasses, marine weather instruments and marine chronometers to customers across the recreational, commercial and professional marine sectors.

Located in the traditional seafaring town of El Masnou, near Barcelona, **Autonautic** designs, manufactures, assembles, calibrates and tests its products entirely in-house. Our range includes magnetic compasses, marine chronometers, nautical clocks, barometers, clinometers, thermometers and hygrometers, combining traditional craftsmanship with modern manufacturing techniques.

For more than fifty years, our mission has remained unchanged: to provide mariners around the world with accurate, reliable and durable navigation equipment. During this time, **Autonautic** has supplied more than 70,000 marine compasses and thousands of nautical and meteorological instruments worldwide.

Every compass is assembled, tested in our test bench and individually inspected by experienced technicians before leaving our facilities. This commitment to manufacturing excellence ensures outstanding accuracy, durability and long-term performance at sea.

An important part of **Autonautic**'s identity is the technical expertise gained through decades of compass manufacturing. This expertise enables us to offer worldwide repair, exchange and adjustment services for magnetic compasses of virtually any brand. Supported by an international network of trusted partners and specialist collaborators, we help shipowners and mariners maintain their compasses in optimal operating condition wherever they are located.

Today, **Autonautic** is recognized as one of the world's leading specialists in magnetic compasses. Manufacturing remains at the heart of our company, supported by technical expertise and customer service that help ensure a long operational life for every product we deliver.

Our compasses

For more than five decades, Autonautic has been dedicated to the design and manufacture of magnetic compasses that combine accuracy, reliability and timeless craftsmanship, ensuring dependable performance wherever the voyage may lead.

“Magnetic compass is the soul of the ship”

Victor Hugo (1866)

Handbearing compass

V-FINDER

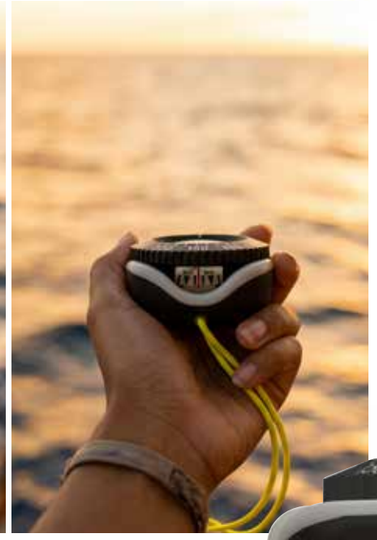

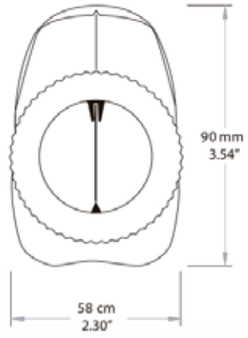

The V-FINDER combines ergonomic design, durability and reliable performance in a compact floating compass. Lightweight and comfortable in either hand, it features accurate bearings, a photo-luminescent dial, a memory ring and fluid damping for stable readings in all conditions. Shock, water and sand resistant, it is the ideal companion for every adventure on the water.

FEATURES
Light & ergonomic
Memory Ring
Field of view: 30°
Photoluminescent dial
Red rubber line
Hi-tech bottom cell
Ambidextroous design
Floating and waterproof

Surface mount

C2-KAYAK

The **C2-KAYAK** is a lightweight, easy-to-mount compass designed for serious paddlers. Mounted directly in front of the paddler, it provides an instant heading reference, allowing you to stay on track without taking your eyes off the horizon or your hands off the paddle.

Ideal for rivers, estuaries and low-visibility conditions, it helps you navigate bends, braided channels and strong crosscurrents with confidence. The C2-KAYAK delivers dependable guidance when it matters most, while its no-drill mounting system ensures quick, secure and fully reversible installation without modifying the kayak

FEATURES
Compact, lightweight construction
Constant heading reference for river bends, and junctions
Forward-mounted for hands-free, at-a-glance reading
No-drill installation via deck-line mounting system
Fully waterproof with scratch resistant compass dome
Adjustable hood for glare reduction
High-strength elastic cords with UV-resistant nylon clips
Designed to endure harsh paddling environments
Robust and durable construction

Surface-mount compass for small boats

C3 RANGE

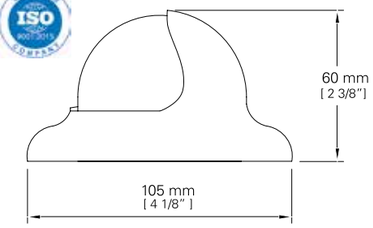

C3001

C3002

The **C3** compasses are the smallest produced by Autonautic. They are a popular choice for small craft such as RIB's, dinghies and traditional built sailing skiffs. The popularity of this compass is in part due to the surface mounting -no unsightly aperture needs cutting, the only drilling necessary is 3 small holes for the screw fixings. It is well damped to cope with the greater range of movement in a RIB or dinghy and features a spherical card that is easy to read when standing up or sitting down. Is available in two color options: black and white.

FEATURES
65mm conical card
5° graduation
1 lubber line
12V
5 years warranty
Sapphire jewel / hardened steel pivot dial movement

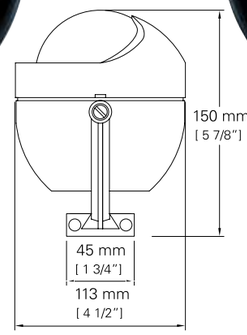

Bracket-mount compass

C12 RANGE

C12-001

C12-002

The **C12** bracket-mount compass is one of the most versatile models in our range, serving as the premier choice for rescue craft and lifeboats. Its adjustable bracket design provides flexible mounting options across various helm setups, while the housing accommodates an optional compensator kit for precise magnetic calibration.

Combining refined styling with rugged durability, the C12 suits both leisure craft and professional workboats. Its corrosion-resistant, watertight design ensures dependable navigation in harsh sea conditions.

FEATURES
85 mm flat or conical card
5° graduation
Anti-glare screen
12/24 V lighting
Optional compass adjustment kit
Individual MED/SOLAS certicate included
Repairable
Exclusive 5 years warranty

OPTIONAL ACCESSORY

Flush-mount compass

C12PLUS RANGE

The **C12Plus** is a highly versatile flush-mount compass engineered for both commercial vessels and leisure craft. Featuring a flat card design with 5° graduations and an anti-glare screen, it is optimized for low, helm-adjacent positions—such as navigation consoles or steering pedestals—ensuring optimal line-of-sight readability when helming from a standing position.

Designed with a generous mounting flange, the C12 Plus is an ideal replacement choice, effortlessly covering larger pre-existing cutouts or sun-fade marks on older consoles. It includes 12/24V lighting, a protective cover, and an individual MED/SOLAS certificate for commercial compliance.

Bulkhead-mount power & sailboats

C15/150 RANGE

The C15/150 flush-mount compass range embodies the perfect balance of refined nautical design, precision and proven marine performance. Developed for discerning powerboat and sailing yacht applications, its flush-mount construction integrates elegantly into the cockpit or helm station, while the deep black finish creates a sophisticated, low-reflection appearance designed to enhance readability in demanding light conditions.

C15/150-0063 features a flat card, providing clear and direct readability for overhead or helm-level viewing. **C15/150-0064** features a conical card, offering enhanced visibility from a wider range of side angles, making it particularly well suited to bulkhead mounting and installations where viewing height varies.

Built to meet the demands of professional marine use, the C15/150 combines robust, commercial-grade construction with refined aesthetics and dependable magnetic performance.

A sophisticated choice where precision, durability and uncompromising nautical design are equally essential.

C8-0027

The **C8-0027** bracket-mount compass is one of our most popular and versatile models, engineered for workboats, motorboats, and sailboats alike. Derived from a vertical bulkhead-style design, its high-visibility card provides an exceptionally wide viewing angle for effortless line-of-sight readability across various helm positions. Built to withstand demanding sea conditions, it combines a rugged, stylish housing with versatile mounting options for installation on flat surfaces, bulkheads, or overhead rooflines. Delivering accurate and dependable heading references in all marine environments, the C8-0027 ensures safe and reliable navigation wherever your voyage leads.

Boxed compasses

C4 RANGE WOODEN BOX

The C4 range includes traditional boxed compasses designed for lifeboats, rescue boats and small vessels where a fixed installation is not practical. Housed in beautifully crafted varnished wooden cases, these MED/SOLAS-approved compasses can be safely stowed and quickly deployed whenever required.

The range includes two models: the **C4-00108**, featuring an 85 mm compass card and an integrated battery-powered LED light housed within a compact 155 × 135 × 155 mm wooden case, and the **C4-00114**, equipped with a 100 mm flat card with 2.5° graduations, housed in a larger 190 × 190 × 130 mm wooden case for enhanced readability.

Both models incorporate a gimballed movement to ensure reliable performance in rough sea conditions and are supplied with an individual MED/SOLAS certificate.

Marine professional pelorus

TAX-00122

For generations, the pelorus has remained an indispensable instrument for professional navigation. Used to take relative bearings, assess crossing situations, obtain three-point position fixes and perform celestial observations, it continues to provide reliable information independent of electronic systems.

A valuable tool for compass adjusters, the pelorus also enables accurate deviation checks using the sun's azimuth or prominent coastal landmarks.

Featuring a 125 mm gimballed card with 1° graduations, precision sighting vanes and a sun shadow vane, the **TAX-00122** delivers stable and dependable observations even in challenging sea conditions.

The instrument is supplied in an elegant natural wood storage box designed for deck shoe mounting and includes a black velvet protective bag.

MARINE PROFESSIONAL PELORUS

Watch relative bearings change, predict crossing situations, plot oshore xes with a 3 arm protractor, or check your compass by sun or stars. These are some of the things you can do with a pelorus. Large ships have permanently mounted peloruses, or some that can be mounted in deck shoes. On a smaller scale, these portable peloruses will give you many of the same benets. A compass adjuster will nd this a very nice instrument when calling on an assignment.

155 x 135 x 155 mm

Professional shoe-mount pelorus

TAX-00123

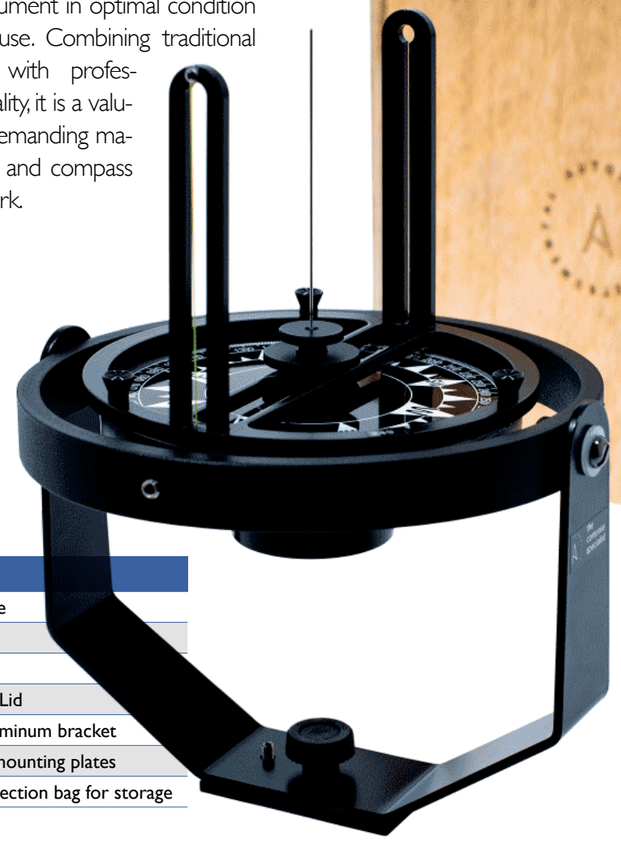

The Professional Shoe-Mount Pelorus is an essential instrument for watch officers and compass adjusters, enabling accurate relative bearings, magnetic deviation measurements and collision-avoidance assessments. It delivers stable and reliable observations even in rough sea conditions.

Designed for installation on the supplied deck shoes, the pelorus can be quickly deployed when required and safely removed after use. The natural wood-finish storage case provides secure protection during transport and storage.

The **TAX-00123** is supplied with a premium black velvet storage bag, offering additional protection against dust, scratches and handling damage while helping preserve the instrument in optimal condition when not in use. Combining traditional craftsmanship with professional functionality, it is a valuable tool for demanding marine navigation and compass adjustment work.

Reflector magnetic compass outfit

C20-00130

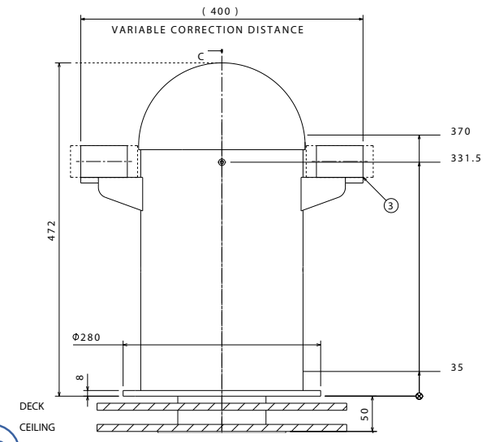

The **C20-00130** Reflector Magnetic Compass is engineered for workboats, fishing vessels, offshore craft and medium-sized commercial vessels where space-efficient installation is essential. Supplied with a standard 1.2 m reflector tube (periscope), it provides clear and reliable heading information at the steering position. Longer reflector tubes can be custom manufactured to suit specific bridge layouts and installation requirements.

An optional Transmitting Magnetic Compass (TMC) pick-up is available for integration with compass repeaters, off-course alarms and navigation systems requiring a magnetic heading source.

When ordered, the TMC is factory-installed, aligned and ready for straightforward connection to the intended equipment.

Combining compact dimensions, rugged construction and proven reliability, the C20-00130 is designed to deliver dependable performance in the most demanding marine environments. Each compass is supplied with an individual MED/SOLAS, USCG and UK-MER certificate.

FEATURES
125 mm card CLASS A magnetic compass
1 degree gradutation
Textile waterproof cover
B+C compensation system built-in
Quadrantal correctors for steel hull

The **C20-00128** Magnetic Compass is engineered and designed for a wide range of workboats and mid-sized vessels. Fully compliant with European MED Wheelmark requirements, USCG approval and UK Marine Equipment Regulations (UK-MER), it provides a reliable source of magnetic heading information for professional marine applications.

An optional but highly recommended Transmitting Magnetic Compass (TMC) pick-up is available for integration with compass repeaters, off-course alarms and navigation systems requiring a magnetic heading source. When ordered, the TMC is factory-installed, aligned and ready for straightforward connection to the intended equipment.

Developed for continuous service in demanding marine environments, the C20-00128 combines rugged construction, dependable performance and the long-term reliability expected from a professional magnetic compass. Each compass is supplied with an individual MED/SOLAS, USCG and UK-MER certificate.

OPTIONAL ACCESORIES

APPROVALS

Directive 2014/90/EC on marine equipment
USCG Type Approved
ISO 9001 certified managment system
UK MER Type Approved

FEATURES

125 mm card CLASS A magnetic compass
1 degree gradutation
B+C compensation system built-in
Quadrantal correctors for steel hull
Arrangements for NMEA0183 TMC sensor
Marine Aluminium binnacle grade
220 VAC / 115 VAC / 24 VDC
10 Years exclusive warranty
Reduced shipyard installation
Waterproof cover (scope of supply)

Spare magnetic compass

C20-00131

FEATURES

125 mm Dial Size
Flat Card Design
Graduation every degree with cardinal markings
Wooden Box Dimensions: 245 x 245 x 135 mm
Sliding cover
10 years warranty

APPROVALS

Directive 2014/90/EC on marine equipment
ISO 25862:2019
ISO 9001:2015
UK MER Type Approved
USCG Type Approved

The **C20-00131** is the dedicated spare compass for the Autonautic C20 Class A compass range, including models 00128, 00130 and 00137. Designed as a ready-to-use replacement unit, it allows the vessel's primary compass to be temporarily replaced whenever maintenance, damage or unexpected failure makes the main compass unavailable. Compact, robust and easy to stow, the C20-00131 is particularly suitable for commercial vessels requiring a certified spare compass. It also provides an ideal solution for workboats, harbour service craft and offshore vessels where a Class A magnetic compass is required but installation space does not permit a conventional binnacle arrangement.

TMC sensor

C20-00132

The **C20-00132** Pick-Up Sensor converts the magnetic heading generated by any compass in the Autonautic C20 Class A range into NMEA 0183 data, providing a reliable interface with repeaters, autopilots, radar systems, and other onboard navigation equipment. By using the vessel's primary magnetic compass as the heading source, eliminates the need for an additional electronic compass, reducing system complexity while ensuring consistency across all connected navigation systems.

FEATURES

Converts Magnetic Heading to NMEA 0183
5 pin male/female pin connectors
Over-strength eld protection
Compatible with Existing Marine Compasses
Suitable for Repeaters, Autopilots & Navigation Systems
IP68 Waterproof Protection
Supplied with 3 m Connection Cable
Mounting Plate Included
Can also be used to measure rudder and trim tab angles

Compass course repeater

C20-00133

The **C20-00133** is a weatherproof IP67 compass card repeater, providing clear heading information at a glance. Suitable for both outdoor and interior installation.

MECHANICAL

Dimensions: 110 x 110 x 32.5 mm
Cable Length: 4m
Weather Resistance: Sealed to IP67

FEATURES

Shows heading on a moving compass card
Clear 'at a glance' analogue display
Intuitive, single function simplicity
Backlit for clear night use
Surface mount installation to avoid need to cut holes

Bracket-mount compass with deck shoe

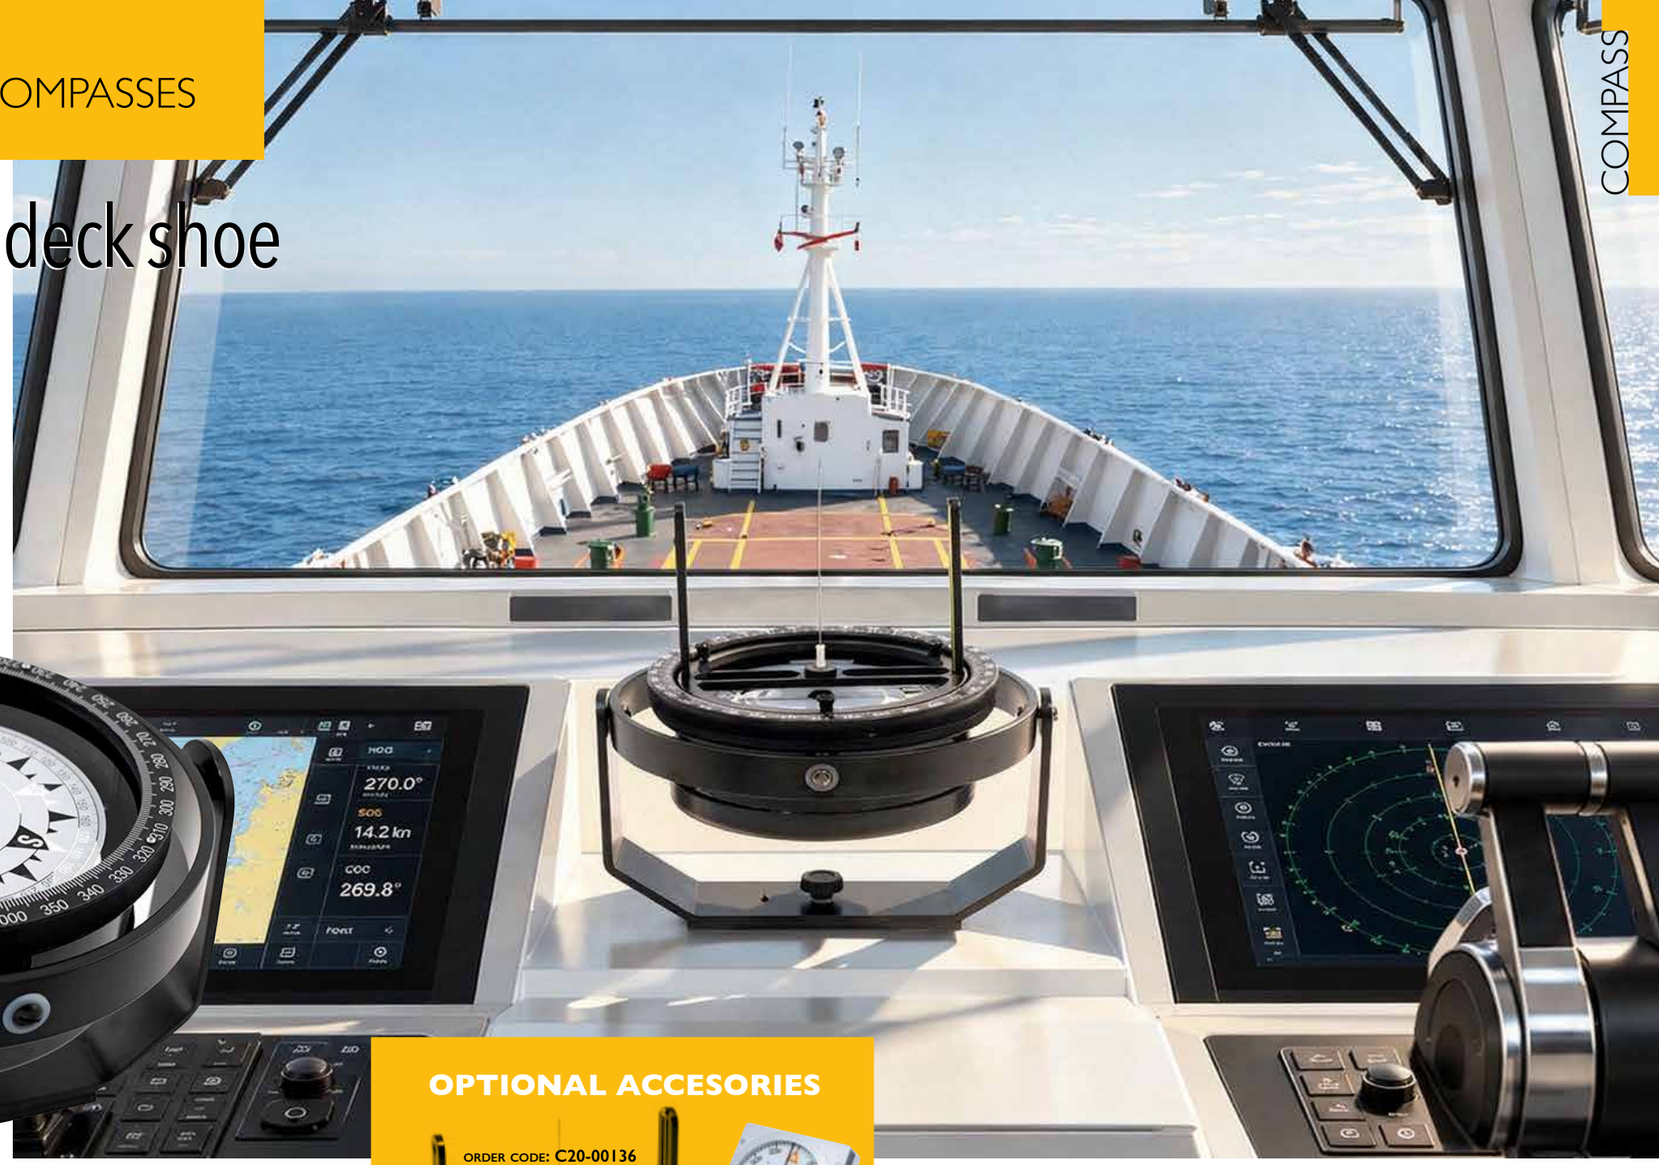

C20-00137

The **C20-00137** is Autonautic's best-selling Class A magnetic compass, featuring a quick-release deck shoe bracket manufactured from polymer-coated marine-grade aluminium. Designed for a wide range of workboats and mid-sized vessels, its versatile mounting system allows bulkhead, surface or stand installation to suit a wide range of vessel layouts. Featuring a 125 mm flat card with 1° graduations and a bearing circle, the C20-00137 provides excellent readability and a reliable source of magnetic heading information. Combined with the optional C20-00136 sighting vanes and shadow pin, the bearing circle enables accurate azimuth observations of celestial bodies and known landmarks.

The compass holds European MED Wheelmark, USCG and UK-MER approvals, ensuring compliance with key international marine equipment requirements.

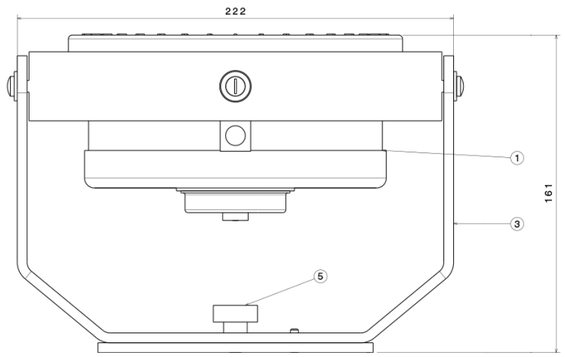

An optional C20-00132 NMEA 0183 TMC Pick-Up Sensor is available to provide magnetic heading data to digital repeaters, off-course alarms and gyro backup systems. When ordered with the compass, the sensor is factory-installed, aligned and ready for direct connection to the intended equipment.

Our clocks, weather instruments & chronometers

Our instruments combine traditional design, elegance and functionality. Crafted with attention to detail, they are built to withstand demanding marine environments.

“From historic captain’s cabins to modern interiors, the marine chronometer remains a timeless symbol of precision and maritime heritage”

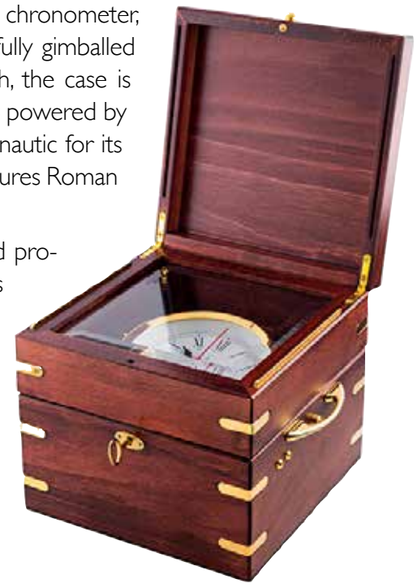

MARINE QUARTZ CHRONOMETER

Professional gimballed chronometer

The Autonautic **CMQ** is a classically styled professional marine quartz chronometer, designed and manufactured by Autonautic and presented in an elegant, fully gimballed carriage case. Crafted from fine beechwood with a rich mahogany finish, the case is complemented by 18-carat gold-finished brass fittings. The chronometer is powered by a high-quality German U.T.S. quartz movement, carefully selected by Autonautic for its reliable performance and accurate timekeeping. Its refined 12-hour dial features Roman numerals, an inner Arabic numeral scale and a sweep seconds hand.

The clock is housed in a solid brass case with an 18-carat gold finish and protected by a 5 mm thick bevelled crystal glass bezel. Combining Autonautic's traditional nautical craftsmanship with dependable quartz technology, the CMQ delivers a timekeeping accuracy of less than one second per day.

CMQ

FEATURES

Minor 72 series

The Autonautic **Minor 72** Series combines compact proportions, refined nautical styling and functional clarity. With a base diameter of just 72 mm, it is the most compact instrument collection manufactured by Autonautic, making it an elegant choice for smaller craft, bespoke panels and installations where space is at a premium.

The collection comprises a quartz clock, barometer, thermometer and hygrometer, each available in four distinctive configurations: a classic gold-plated finish with white dial, a contemporary matt black finish with white dial, chromed brass with a contrasting black dial and the *total black*, a matt black finish with black dial . From traditional nautical elegance to a more modern and understated aesthetic, each configuration offers its own distinctive character.

Atlantic 95 series

The Autonautic **Atlantic 95** Series combines balanced proportions, timeless nautical styling and functional design. With a 95 mm base diameter and a clear white dial, the collection provides excellent readability within an elegant, compact format.

The range comprises three coordinated instruments: a quartz clock, barometer and comfortmeter, combining temperature and humidity readings with a comfort-zone indicator. Each instrument is available in three distinctive finishes: classic gold-plated brass, polished chromed brass and contemporary matt black.

EASY FIX SYSTEM

To ensure easy operation and installation, an easy fix system is supplied in our 95 & 120 range of instruments which allows access to the movements, battery replacement or adjustment without removal from the bulkhead.

NAUTICAL WEATHER STATIONS

Atlantic 95 series

The Autonautic **Atlantic 95 Nautical Weather Station** brings together refined craftsmanship, functional clarity and the enduring character of traditional marine instrumentation. A quartz clock, barometer and comfortmeter are elegantly arranged on a finely crafted wooden panel, creating a coordinated composition for distinguished marine and contemporary interiors.

The **EG** edition pairs gold-plated polished brass cases with a natural lacquered or black wooden panel, expressing classic nautical elegance. The **EGC** edition combines chromed brass cases with a black panel, offering a sophisticated and contemporary interpretation of the collection.

Supplied in a horizontal configuration, both editions can be easily adapted for vertical display. Conceived as both a functional instrument set and a distinctive decorative piece, the Atlantic 95 Weather Station reflects Autonautic's commitment to timeless design, lasting quality and authentic nautical heritage

Our services

Magnetic Compass Services

Autonautic provides ships compass surveys, compass adjusting services, replacement and installation on-board your vessel. Within the shortest time, no matter where you are. Autonautic has implemented and maintain ISO 9001:2015 Quality Management System for the following scope:

Design, manufacture, repair of magnetic compasses for navigation & magnetic compass adjustment on board and remote services

Whatever you need related to magnetic compasses, no matter where you are, Autonautic will try to support and give you the best and quickest solution.

We are the only company worldwide with ISO 9001:2015 Quality certified

IN THE SHORTEST POSSIBLE TIME, NO MATTER WHERE YOU ARE

Compass repair & exchange
Multi-brand

COMPASS REPAIR SERVICE. With routine maintenance, we can ensure that your vessels will have a standard magnetic compass on which they can rely, in any situation. Autonautic Instrumental oers professional magnetic compass repair service, complying the highest standards of quality. Your compass will be restored to perfect working order in the shortest possible time, wherever the vessel is located.

Over 5.500 repairs and a profound knowledge of compass manufacturing provide us with the required experience to repair any type of magnetic compass with total condence. As well as saving the customer money we have an environmentally friendly policy for our planet as we endeavour to repair and extend the life of this equipment.

COMPASS EXCHANGE PROGRAM. Additionally, we provide a Compass Exchange Program. We have a wide and permanent stock of reconditioned and duly certied compasses of the main brands ready to be sent to any destination in the world.

PERMANENT STOCK OF RECONDITIONED COMPASSES

Our services

24/7
On board or remote in all ports of Spain and major ports of the world

Compass Adjustment Service

ON-BOARD & REMOTE • 24/7 WORLDWIDE

Our qualified compass adjusters provide magnetic compass adjustment services on board vessels in ports across Spain, Europe and worldwide. Upon completion, the vessel receives an official compass adjustment certificate together with an individual deviation card.

The service begins with a review of the compass data and photographs to verify suitability. Once the required information has been validated, our adjuster analyzes the results and performs the necessary calculations.

For shipowners seeking a faster and more cost-effective solution, Autonautic also offers a Remote Compass Adjustment Service. Guided by one of our experienced adjusters, the Master or Chief Officer carries out the compass swing while receiving professional support throughout the entire process.

BENEFITS

- **Worldwide availability**
- **Reduced operating costs**
- **No attendance fees**
- **Fast certificate issuance**
- **Professional guidance from qualified compass adjusters**
- **Full compliance with applicable regulations**

If the final deviations comply with the applicable standards, a new compass adjustment certificate and deviation card are issued immediately. Should further corrections be required, our technician provides detailed guidance until the compass is properly adjusted and ready for certification.

Compass adjustment Deck magnets with holders

Smart integration for expert results

Autonautic Compensation Magnet Holders have been developed in close collaboration with industry specialists to support precise, efficient and reliable compass compensation. Designed for seamless integration into the helm station, they provide a clean, discreet finish, making them particularly suitable for vessels with enclosed wheelhouses.

Precision Engineering for Professional Compass Compensation

KEY BENEFITS

- **Designed for Professionals:** Developed around the practical needs of compass adjusters to facilitate accurate and efficient compensation work.
- **Quick and Secure Installation:** Supplied with two fixing screws and extra-strong, removable double-sided tape, offering flexible mounting options while protecting the installation surface.
- **Ideal for Enclosed Wheelhouses:** Particularly suitable for vessels with internally installed compasses.
- **Three Magnetic Strengths:** Available in High, Medium and Low strengths to accommodate a wide range of compass deviations.

AVAILABLE CONFIGURATION

Ø6 × 50 mm Magnet Holder Available in High, Medium and Low magnetic strengths.
Ø6 × 100 mm Magnet Holder Available in High, Medium and Low magnetic strengths.
Multi-Size Magnet Holder A modular, three-slot configuration designed to accommodate magnets in Ø 2 × 20 mm, Ø 3 × 25 mm and Ø 4 × 40 mm sizes. Its dedicated anchoring inserts and secure fitting design ensure correct positioning and alignment for each magnet.

DESIGN & CONSTRUCTION

To enable secure installation without damaging surfaces, each magnet holder is supplied with extra-strong removable double-sided tape, in addition to the two supplied screws. This provides flexible mounting options while helping preserve the integrity of the installation surface.

- **Magnetic Pole Markings:** N and S.
- **Red and Blue Magnetic Bars** for visual polarity identification.
- Manufactured from **Nylon PA12**, a high-performance polyamide.
- Excellent resistance to **salt spray and marine environments**.
- High mechanical **strength and durability**.
- Resistance to **UV radiation and chemical exposure**.

Packaging

That Reflects Our Craftsmanship

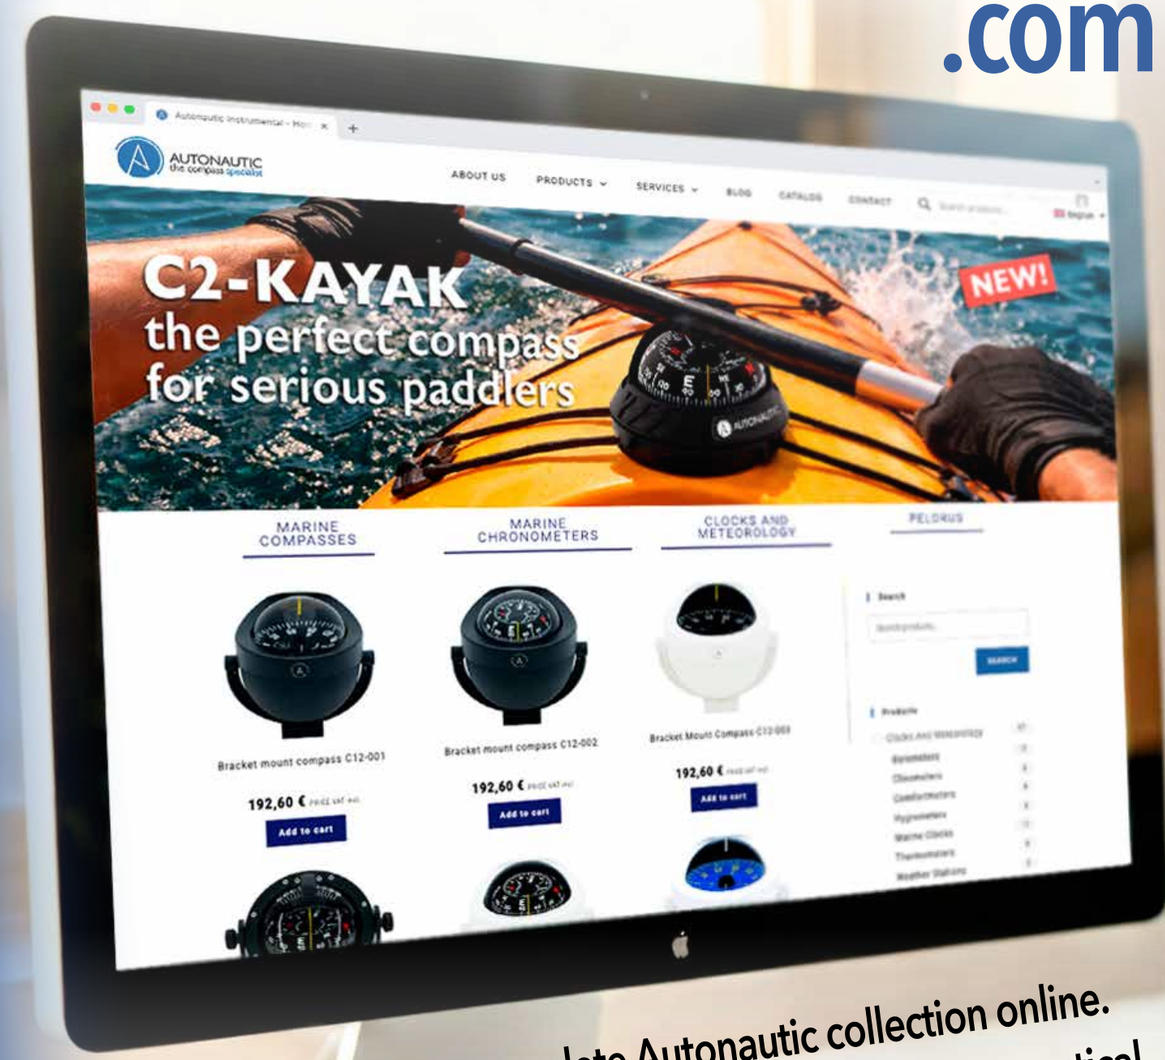

At Autonautic, every product is presented with the same care and attention to detail that define our instruments. Designed to combine protection, functionality and professional presentation, our packaging enhances the customer experience from the very first moment. Many of our products are supplied in custom-designed packaging that maximizes product visibility while creating a distinctive retail presentation.

Crafted to protect.
Designed to impress.

"From the box to the instrument inside, every detail is part of the Autonautic experience"

www.autonauticinstrumental.com

Explore and order the complete Autonautic collection online. From magnetic compasses and marine chronometers to nautical clocks and weather instruments, all available for worldwide delivery.

IN ADDITION:

- Compass repair service
- Compass Exchange Program
- Technical specifications
- Multimedia material

For more than 50 years, Autonautic has been committed to providing reliable marine instruments and exceptional customer support. From product selection and installation advice to maintenance, repair and technical assistance, we stand behind every instrument we manufacture.

Our goal is simple: to ensure that every Autonautic product delivers years of dependable service and that every customer enjoys complete confidence, both at sea and ashore.

Crafted in Barcelona. Trusted worldwide. Supported for life.
